NOTICE OF APPLICABILITY OF RESOLUTION NO. R5-2003-0106 BOGLE VINEYARDS, YOLO COUNTY

Regional Water Board staff has reviewed your 5 December 2006 Report of Waste Discharge (RWD) and supplemental information received on 14 February 2007 to apply for coverage under Regional Water Board Resolution No. R5-2003-0106, the *Waiver of Waste Discharge Requirements for Small Food Processors, Including Wineries, Within the Central Valley Region*. The RWD included a Notice of Intent to comply with the *NPDES General Permit for Discharges of Storm Water Associated with Industrial Activities* and an \$872 filing fee. Our review finds the RWD to be complete.

Resolution No. R5-2003-0106 (a copy of which is enclosed) is a conditional waiver of waste discharge requirements for small food processors, including wineries. Based on the information you have submitted, the discharge as described in the RWD satisfies the general and specific conditions of Resolution No. R5-2003-0106 for the current amount of grapes crushed and wastewater produced.

Discharge Description

Patty Bogle (Discharger) owns and operates the Bogle Vineyards winery at 37783 County Road 144 in Clarksburg, Yolo County (APN 043-140-251). Approximately 900 tons of grapes were crushed during 2006. The Discharger estimates that approximately 1,000,000 gallons of wastewater are generated each year, with monthly totals ranging from 60,000 to 120,000 gallons. The crush pad is in an uncovered area. Wastewater from the crush pad, other outdoor processing areas, and indoor processing areas is collected in a settling sump prior to screening and storage in a 12,800-gallon above-ground tank. Wastewater is periodically removed from the tank and hauled by truck to a municipal wastewater treatment facility (East Bay Municipal Utilities District) for treatment and disposal.

Approximately 414 tons per year of solids (grape stems, seeds, skins, and lees) are screened from the process wastewater into bins. These solids are applied to the adjacent vineyards (approximately 120 acres) by manure spreader prior to the rainy season.

California Environmental Protection Agency

Conditional Waiver

Based on the information submitted in the RWD and subsequent information provided by the Discharger, the discharge as described above satisfies the general and specific conditions of Resolution No. R5-2003-0106 for the projected volume of wastewater and process solids produced. Therefore, this letter serves as formal notice that Resolution No. R5-2003-0106 is applicable and waste discharge requirements for this facility are waived.

Enclosed is a copy of Resolution No. R5-2003-0106 and the associated monitoring and reporting program. As described therein, an annual monitoring report that contains the information described in Items No. 1, 3, and 5 of the monitoring and reporting program must be submitted by **1 February** of each year.

If the discharge violates the terms or conditions of the waiver, the Regional Water Board may take enforcement action, including assessment of administrative civil liability. If the methods of winery wastewater and/or solids disposal change from those described in the RWD, you must submit a new RWD. Please note that the waiver will expire on 11 July 2008, at which time you must submit a new RWD with a filing fee to renew the waiver, or cease the discharge.

Please note that you are required to have a flow meter to measure winery wastewater flows. Therefore, by **30 May 2007**, Bogle Vineyards shall certify in writing that a flow meter is in place and fully operational. The certification shall specify the type of the flow meter and its location.

If you have any questions, please call Anne Olson at (916) 464-4740.
